Complutense University of Madrid (Spain) *2012 - 2016*
Bachelor’s degree in Economics.

RESEARCH INTEREST

- Urban and Regional Economics
- Labor Economics
- Applied microeconomics

RESEARCH

Your Room is Ready: Tourism and Urban Revival *Job Market Paper* R&R Regional Science and Urban Economics

Tourism is an essential sector of the global economy, contributing significantly to GDP and employment. Despite its importance, our understanding of its impact on urban economic activity remains limited. This paper aims to fill this gap by examining the impact of tourism on urban transformation using a dataset of hotel openings in Madrid over the period 2001-2010. I show that hotel openings have a positive impact on the number of establishments and employment by using the number of protected buildings as an instrumental variable to account for the non-random distribution of hotel openings. Interestingly, the impacts vary between different economic sectors and areas within the city,

with tourism-oriented businesses benefiting significantly while production-oriented activities experience negative impacts. In addition, the spatial impacts of tourism extend beyond the immediate vicinity, suggesting indirect economic spillover effects on job creation in more distant areas. Finally, economic effects extend to the real estate market, increasing rental prices and residential investment.
